RACK USA

ABOUT US

At RackUSA, we build comfortable, quality and affordable spaces. For over 50 years we have innovated and dominated the industrial storage systems industry. Now we are moving forward to take the building industry into a new era.

Our on-site building system technology combines the power of manufacturing with on-site construction to make high-quality housing affordable for everyone.

TINY HOMES
A NEW WAY OF LIVING

TINY HOMES are habitable modules made of a metal structure and covered with our resistant and insulating “Necopanel”.

The technology of our on-site construction system combines the power of manufacturing with on-site construction to make high quality housing available to everyone.

ANTI-FLAME

SEISMIC RESISTANT

RESISTANT TO CLIMATE CHANGES, FUNGI AND BACTERIA

OUR ADVANTAGES

Safety first; our structure is designed to resist seismic movements. Manufactured with anti-flame materials that provide protection against UV rays, ideal for outdoor works. Insulation is provided according to use and weather conditions, achieving a constant of efficiency and safety, guaranteeing interior comfort.

- **DESIGNED AFFORDABILITY**
- **CONSTANT AND CONSISTENT QUALITY**
- **QUICK ON-SITE ASSEMBLY**

OUTSTANDING FEATURES

- RESISTANT STRUCTURE
- SPACIOUS INTERIORS
- RESISTANCE TO CHANGES IN CLIMATE, FUNGI AND BACTERIA
- HIGHLY INSULATED WALLS
- ELECTRIC/PLUMB READY
- EASY ASSEMBLY

Resistance to climate changes and UV rays

NECOPANEL

High and insulated ceiling

Anti-flame

Electric/plumb ready

REVOLUTIONARY QUALITY

All these features provide the inhabitants or workers with a better life quality.

Unlike traditional wooden or prefabricated modules, our camps are characterized by being disassembleable and reusable. Their easy assembly and light components allow a fast, safe and economical installation.

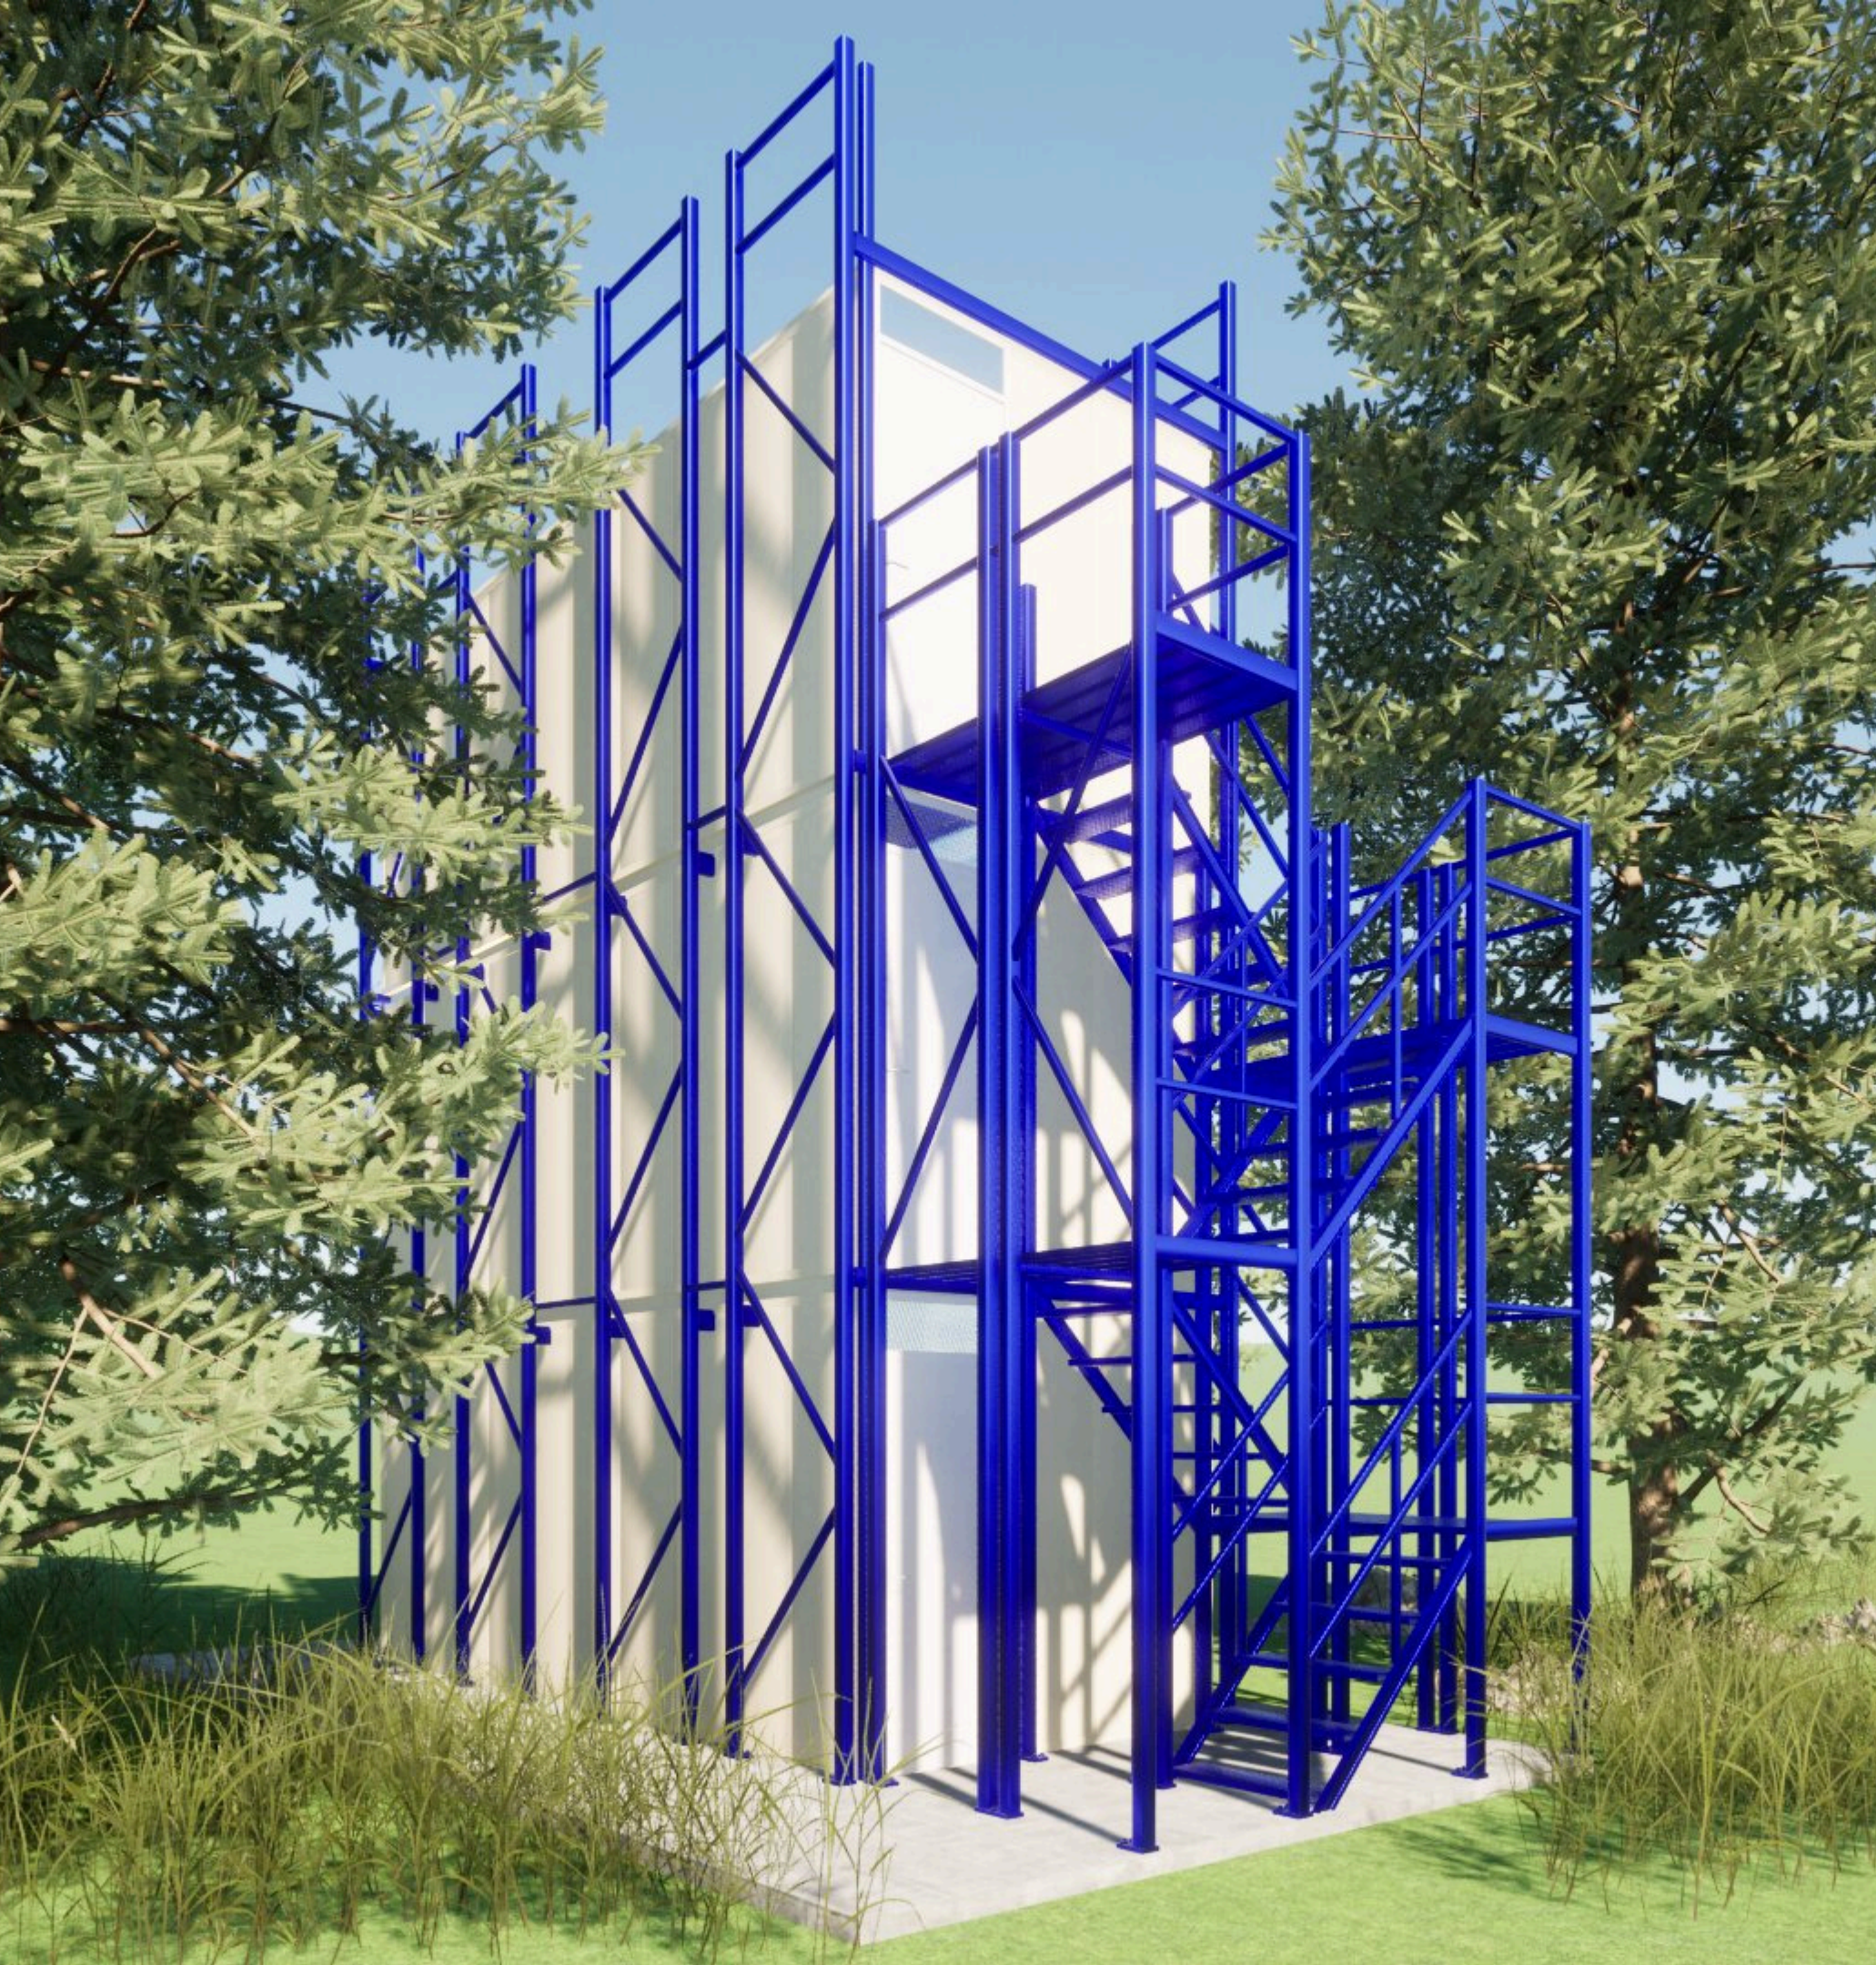

CONVENIENCE AND COMFORT, WELCOME TO THE NEW ERA

Our modules can be used as bedrooms, dining rooms, kitchens, recreational areas, infirmaries, offices, warehouses and any space that needs to be covered to provide habitability in remote areas.

In addition, the modules can be interconnected by means of corridors, creating functional complexes.

**TINY
STANDARD**

TINY SUITE

EFFICIENT PRODUCTION

Production depends on three factors:

- The number of modules requested
- The dimensions of the modules
- The areas to which they will be directed

We design the project according to the client's needs.
